

10th May 2022,

It is with pleasure that I am writing this recommendation letter for Konstantinos Timinis whom I have taught Science at PASCAL Private English School, Lefkosia.

Konstantinos has always been very diligent, hard-working, mature pupil. He aims high and is determined to achieve his goal. He was an active participant in all his lessons, spoke eloquently about topics posed and clearly stated his arguments wanting his ideas to be heard. He is creative and possesses strong critical thinking skills.

Throughout his 5 years at PASCAL, Konstantinos belonged to the pupils' council every year and was an active member of several clubs organized by our school, such as Photography, Robotics and Junior Achievement. I had the pleasure of being working with him in the former one, together with a group of pupils from his year group they created from scratch a company in order to participate in Company of the Year Program 2022 organized by Junior Achievement Cyprus. He took the role of CFO and managed with diligence and maturity the project. He was ahead of the expectations of the program and showed how all the skills that he has develop thought the years made him an excellent leader and great team player. They have also been awarded the opportunity of participating on the National ClimateLaunchpad Competition, in which he will also be involved.

Konstantinos is mature, polite young man with a pleasant personality, helpful and respectful with his peers. He worked very hard to achieve good academic excellence and I am certain that he possesses the ability to continue in this manner with his accounting apprenticeship. As a teacher at PASCAL Private English School Lefkosia, and knowing his persistence and effort, I wholeheartedly recommend Konstantinos Timinis as a candidate at your program.

Yours Sincerely,

Cristina Jimenez

Chemistry Teacher and Eco- School Representative and Junior Achievement Supervisor
